- Quality Management of imported products, in accordance with the current International Standard 9001 and the BPADT standard.
- Compliance with legal and regulatory requirements, interested parties and those offered to our clients, providing security and confidence.
- Effective management and control in the processes of each area.
- Continuous improvement of the processes, services and products offered.
- Effective assignment of functions and responsibilities to each department
- Commitment to take into account the risks and opportunities that may affect the company globally.
- Creation of value and belief by our company to reflect a good identity in our market.
- Fulfillment of requirements demanded by the ARCSA to keep us as leaders in the market.

This policy is also intended to provide a frame of reference for the establishment of quality objectives. In addition, for the effective application of these principles, it is absolutely necessary to support them both from senior management and from all employees of the organization.
